Traditional

## The Environment

Low Emitting Materials

No Off-Gassing

No Timber Harvested

Surface Film Post Industrial  
& Post Consumer Recyclable

CARB 2 Compliant MDF

Wainscot Panels have the power to enhance the look of any room. The Spectrim pre-finished system of moldings made from thermofilm applied to medium density fiberboard core provide the rich and warm look of real wood with all the practical advantages of superior millwork.

- Pre-finished Modular System  
No sanding, staining, or painting
- Durable & Impact Resistant
- Costs Less Than Real Wood
- Easy to Install  
Tongue & groove components
- Reduces Waste  
No knots, splits, or sap streaks
- 3 Panel Styles  
City Flat, Country Bead, Classic Raised
- Custom Heights
- Coordinate with Spectrim Moldings
- Withstands Harsh Cleaning Agents
- UV Protected  
5 Year Color Fade Warranty

- The film veneer equals and often surpasses the beauty of real wood and offers color consistency that cannot be achieved with wood finishes.

## Three Panel Styles

### City Flat

Thermofoil film laminated to an MDF flat panel provides a smooth and attractive recessed appearance. 1/4" flat panels shipped in 48" widths and pre-cut to the perfect height. Cut in the field to suit your stile spacing. Simply slide the 1/4" panels into the grooves to create the stiles and rails.

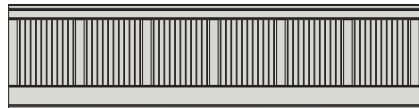

City Flat  
CFP-144  
36"H x 144"L

### Country Bead

Thermofoil film formed over an MDF beadboard panel, provides beautiful detailing. Beaded panels are shipped in 48" lengths and pre-cut to the perfect height. Simply slip the 1/4" beaded panels into the grooves provided to create the stiles and rails. This process alleviates numerous beaded planks, saving you time and money during installation.

36"H x 144"L

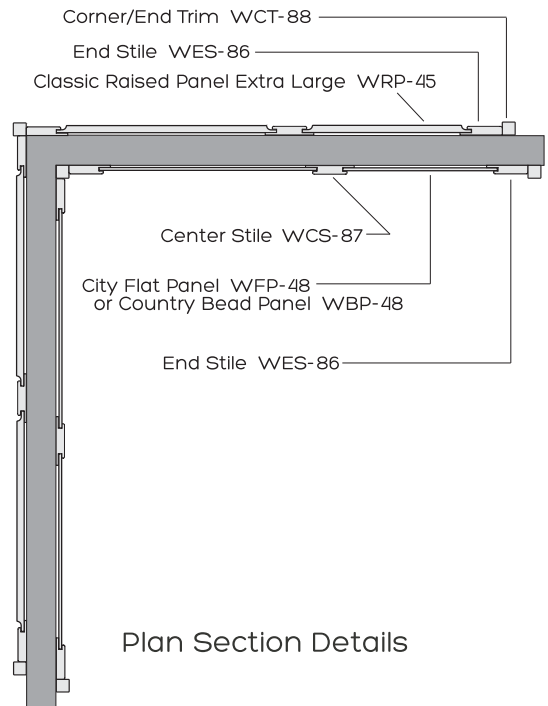

### Classic Raised

Traditional raised panels use our thermofoil film formed onto a 5/8" MDF core, providing a beautiful raised edge detail sized and numbered panels. Panels slip into concealed grooves and float between the stiles without fastening. Raised panels are specially made to provide stability without glue joints maintaining the rich appearance of solid wood. Field measurements are required.
