Surface Film Post Industrial & Post Consumer Recyclable

CARB 2 Compliant MDF

Spectrim® Molding is pre-finished with a decorative and protective thermofoil film surface. The finish is 12 to 16 mil thick and factory applied with adhesive, heat, and pressure to a medium density fiberboard core that has been shaped into the molding profile.

- Pre-finished Realistic & Durable Decorative Film Veneer
- Impact & Scratch Resistant
- Costs Less Than Real Wood Trim
- Easy to Install
No sanding, staining, or painting
- Realistic Wood Finishes
- No Knots, Sap-streaks or Splits
Saves on waste
- 30 Traditional & Contemporary Profiles
- Withstands Harsh Cleaning Agents
- Custom Profiles Available
- UV Protected
5 Year Color Fade Warranty
- The film veneer equals and often surpasses the beauty of real wood and offers color consistency that cannot be achieved with wood finishes.

Traditional

Contemporary

Custom Profiles

Custom profiles can easily be created for similar cost savings over real wood, provided a minimum order of 2,500 linear feet is produced. Smaller quantities may be acceptable for a set-up fee. We welcome your inquiries.
