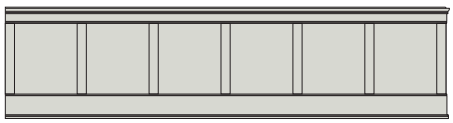
Wainscot Specs & Finishes

Three Panel Styles

City Flat

Thermofoil film laminated to an MDF flat panel provides a smooth and attractive recessed appearance. 1/4" flat panels shipped in 48" widths and pre-cut to the perfect height. Cut in the field to suit your stile spacing. Simply slide the 1/4" panels into the grooves to create the stiles and rails.

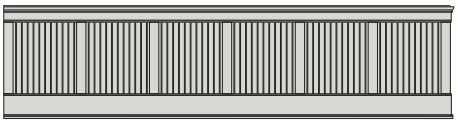
City Flat
CFP-144
36"H x 144"L



Country Bead

Thermofoil film formed over an MDF beadboard panel, provides beautiful detailing. Beaded panels are shipped in 48" lengths and pre-cut to the perfect height. Simply slip the 1/4" beaded panels into the grooves provided to create the stiles and rails. This process alleviates numerous beaded planks, saving you time and money during installation.

Country Bead Board
BP-144
36"H x 144"L



Classic Raised

Traditional raised panels use our thermofoil film formed onto a 5/8" MDF core, providing a beautiful raised edge detail sized and numbered panels. Panels slip into concealed grooves and float between the stiles without fastening. Raised panels are specially made to provide stability without glue joints maintaining the rich appearance of solid wood. Field measurements are required.
